

## Consumers Warehouse Center, Inc. Saves Time Using the Latest NOVAtime Net Suite Integration Bundle

NOVATIME TECHNOLOGY, INC. – DIAMOND BAR, CALIFORNIA – MARCH 13, 2013

---

*"With the new NOVAtime Bundle, we can export payroll/time-bill records with labor tracking data such as department, location, and class information from NOVAtime into NetSuite automatically."*

---

Based in New York, Consumers Warehouse Center, Inc. has provided consumers with home improvement and furnishing needs since 1977. Consumers Warehouse features many award-winning designer and appliance showrooms and supercenters, as well as providing support and design services. In 2011, Consumers reviewed the benefits and efficiencies of an automated time and attendance system, and decided utilize NOVAtime's advanced workforce management solution, NOVAtime 4000 Software as a Service. This year, Consumers further streamlines its workforce management systems by utilizing NOVAtime 4000's enhanced interface with its NetSuite business system.

NOVAtime 4000 is a fully-integrated workforce management solution that is complete with time and attendance, scheduling, accrual, and leave features, all in a single package. Although already a leader in the workforce management industry, NOVAtime continues to commit much of its resources every year back into research and development in an ongoing effort to develop new methods to optimize NOVAtime 4000, resulting in a state-of-the-art system using the latest technology. NOVAtime 4000's interface platform integrates with virtually any payroll, ERP, and human resources systems, such as NetSuite. Even with an existing interface to NetSuite, NOVAtime sought to further its dedication to customers by creating a SuiteApp for NetSuite, keeping in line with its business philosophy by providing a cutting-edge solution.

SuiteApp's NOVAtime 4000 Bundle is an enhanced integration with NetSuite that requires Consumers to download a free NetSuite Bundle from their NetSuite system, and order a NetSuite Interface module in NOVAtime 4000 SaaS. The interface provides seamless integration and boosts both systems' capabilities. While working in NetSuite, Consumers users can add and change classification data (known as departments, locations, and classes in NetSuite), and have that data automatically reflected in the NOVAtime 4000 system. Additionally, if Consumers adds new hires, terminates an employee, or updates employee information in NetSuite, these changes are displayed in NOVAtime 4000 automatically. The SuiteApp NOVAtime 4000 Bundle also exports summarized work hours by labor codes such as departments, locations, and classes into NetSuite's "Time Bill" records automatically. John Baloga, Treasurer of Consumers Warehouse Center, says, "This automatic transfer of classification and employee data from NetSuite into NOVAtime saves time and keeps both NOVAtime and NetSuite systems in sync. It reduces the amount of

time that we spent on redundant data entry, while making our workforce more efficient.

Payroll also receives enhancements from the new SuiteApp NOVAtime 4000 Bundle. Mr. Baloga adds, "With the new NOVAtime Bundle, we can export payroll/time-bill records with labor tracking data such as department, location, and class information from NOVAtime into NetSuite automatically. It eliminates duplicate data entry, saving valuable time and company resources."

An organization's transition over to an automated time and attendance system is a big investment. However, in choosing NOVAtime, Consumers can be confident they will receive continued updates and enhancements with the most up-to-date and complete workforce management solution on the market. Mr. Baloga noted that NOVAtime's implementation and service had been fantastic. When asked to describe how the NOVAtime Workforce Management solution has provided intangible savings and benefits for Consumers Warehouse Center, Mr. Baloga asserted, "The NOVAtime system satisfies our timekeeping needs and it would be impossible to go back to the old ways."
