Sun Chemical Corporation Implements New NOVAtime NT7000 Smart Time Clocks

Sun Chemical Corporation Implements New NOVAtime NT7000 Smart Time Clocks

DIAMOND BAR, CALIF. ([PRWEB](#)) April 08, 2014 -- NOVAtime Technology, Inc. (http://www.novatime.com), a leading provider of enterprise Time and Attendance/Workforce Management solutions, announced that Sun Chemical Corporation is using NOVAtime's latest touchscreen time clock, the [NT7000 smart time clock](#), along with the [NOVAtime 4000 STAR system](#).

Sun Chemical, a member of the DIC group, is the world's largest producer of printing inks and pigments and a leading provider of materials to packaging, publication, coatings, plastics, cosmetics, electronic materials, brand protection, specialty services and other industrial markets, including electronic materials, functional and specialty coatings, brand protection and product authentication technologies. With more than 250 locations worldwide and a broad breadth and depth of resources from which to draw, Sun Chemical's unparalleled global presence allows for the delivery of local service and support that is customized to the markets it serves.

Sun Chemical has been a NOVAtime client since February 2013, and has since been rolling out the NOVAtime 4000 Time and Attendance/Workforce Management system to multiple locations through the United States, with approximately 2,500 employees nationwide. In early 2014, Sun Chemical decided it wanted to adopt NOVAtime's latest time clock release, the NT7000, at its Muskegon, IL location. Steven Hills, Payroll Manager USA at Sun Chemical, states, "We are excited to be using the latest smart time clock technology with the NOVAtime NT7000. It has so many features that most other time clocks do not offer!"

The NT7000 provides full self-service capabilities for employees, and its advanced Lumidigm fingerprint reader provides reliability and performance, delivering fast and accurate readings time after time. Specifically for Sun Chemical, employees are able to punch in and out, view their timesheets, view their accrual balances, and submit their timesheets right at the device. Because the NT7000 provides a beautifully rich 7" high-resolution color display with capacitive touchscreen, all information is easily visible. Mr. Hills adds, "Our employees have really enjoyed using the NT7000. It is very user-friendly and makes everything very convenient and easy for them. And the biometric fingerprint reader is flawless!"

Other features of the NT7000 include the ability to load videos (making training and other tools easy for employees to view), a wide-angle camera for photo capture upon punch submission (usage optional), and the ability to distribute private messages to employees. These cutting-edge features, in addition to enhanced performance, make the NT7000 a state-of-the-art time clock for any organization.

NOVAtime values its partnership with Sun Chemical, and is excited to see Sun Chemical embrace NOVAtime's latest technology. Brian Harris, Vice President of Professional Services at NOVAtime, explains, "We develop our software and hardware devices with the user in mind, and we are happy that our customers appreciate all the extra details and features that make the NT7000 a truly great time clock." Mr. Hills agrees, "NOVAtime's services have been great, and both their software and hardware are unparalleled." NOVAtime is looking forward to a lasting relationship with Sun Chemical.

Sun Chemical uses the APD Payroll.

About NOVAtime

Established in 1999, NOVAtime has helped over 10,000 organizations around the world benefit from the use of NOVAtime Workforce Management solutions. With corporate offices located in Diamond Bar, California, NOVAtime utilizes the latest advancements in technology for its complete suite of Workforce Management solutions. This has enabled NOVAtime to serve companies with complex data collection requirements, including badge/biometric time clocks, browser-based data collection, telephone features, PDA scanners, etc. NOVAtime offers solutions for scheduling, labor allocation, job costing, work-order management, and cost center allocation. The NOVAtime 4000 SaaS solution is delivered via Software-as-a-Service and features a multi-tiered, multi-tenant infrastructure. Alternatively, the NOVAtime 4000 STAR licensed solution can be delivered on-premise, installed on the customer's servers. While NOVAtime 4000 STAR is available for companies with over 1000 employees, NOVAtime also offers the NOVAtime 4000 STARbox for companies with up to 1000 employees. For more information about NOVAtime and to learn about how it has helped other companies control costs and remain compliant with today's challenging business requirements, please visit www.novatime.com or call 877.486.6682.
