City of Tahlequah

NOVAtime's Workforce Management Solutions Save Time for Tahlequah City

The Tahlequah City in Oklahoma uses the NOVAtime's Workforce Management/Time and Attendance solutions with eleven (11) Schlage HandPunch 3000 terminals to manage their workforce.

"Having the HandPunch terminals, working in tandem with our NOVAtime Time and Attendance software, has made this aspect of my job much easier and less time consuming," attests Sue Stacy, Tahlequah's Human Resource Director. "The NOVAtime system calculates everything, including hours, sick leave and vacation. It provides better management and tracking of our employees. If a department head cannot find an employee, they simply call me and I let them know which clock the employee most recently used."

"From a technician standpoint, the system works well," reports the IT Manager of the city Ed Gross. "I do not really have to do much with the time clocks. With a regular punch clock, time is not stored. This NOVAtime system does everything automatically. Its increased capability delivers more flexibility and lessens administrative duties. It saves time and, from an IT perspective, I would recommend others to consider such a solution."

So does Stacy, "I would recommend the NOVAtime system to other cities."

Compu-Time of Oklahoma City provided the City of Tahlequah with the Schlage HandPunch and the NOVAtime Time and Attendance system to manage their workforce.

For more information on NOVAtime and how they can help you streamline your workforce management needs, please email sales@novatime.net or call 877.486.6682.
